

Assignments

Topic-wise practice worksheets, one folder per week of the plan in `../docs/03-practice-plan.md`. Each folder (once built) contains:

- `assignment.md` — the questions (4-option MCQ, Class 5 difficulty)
- `answer-key.md` — correct options with a short worked explanation each

Folder list (per the 12-week plan)

Folder	Topic	Status
01-number-sense/	Place value (7–8 digit numbers), number names, ordering, rounding, Roman numerals	✓ Built
02-four-operations/	Addition, subtraction, multiplication, division (large numbers + word problems)	✓ Built
03-factors-multiples-patterns/	Factors, multiples, HCF/LCM, number patterns	✓ Built
04-fractions-decimals/	Comparing & equivalent fractions, decimal operations	✓ Built
05-percentage-ratio-profit-loss/	Percentage, ratio & proportion, profit/loss, simple interest	✓ Built
06-measurement-money/	Length, weight, capacity, time, temperature, money, conversions	✓ Built
07-geometry-perimeter-area/	Shapes, symmetry, perimeter, area of rectangle/square	✓ Built
08-data-handling/	Tally marks, pictographs, bar graphs	✓ Built
09-reasoning-patterns-coding/	Patterns, analogy, classification, alphabet test, coding–decoding, logical sequence of words, puzzle test	✓ Built
10-reasoning-direction-figures/	Ranking, direction sense, mirror & water images, embedded figures, clock & calendar	✓ Built (18 Q)
11-achievers-hots/	Multi-step HOTS problems across all topics above	✓ Built

All 11 folders are built in the same two-file (`assignment.md` + `answer-key.md`) shape, 15 questions each — except `10-reasoning-direction-figures/`, which has 18 (10 text-based + 8 diagram-based). `08-data-handling/` and `10-reasoning-direction-figures/` also ship an

`images/` folder of SVG diagrams referenced from their `assignment.md`, built the same way as the [Class 4 kit](#).

Class 5's Week 10 adds **water images** alongside mirror images — the upside-down reflection you'd see below a water surface, as distinct from a left-right mirror flip. The `images/water-q14.svg` question uses the letters b/d/p/q, which are exactly the four ways of flipping one shape — a genuinely useful way to see the difference.
