

Week 4 — Fractions & Decimals — Answer Key

Q1. A) $10/12$ — Multiply top and bottom of $5/6$ by 2: $10/12$.

Q2. B) $3/7 < 4/7$ — Same denominator, so compare numerators: $3 < 4$.

Q3. C) $5/6$ — As decimals: $2/3 \approx 0.67$, $3/5 = 0.6$, $5/6 \approx 0.83$, $1/2 = 0.5$ — the greatest is $5/6$.

Q4. A) $2/3$ — The greatest common factor of 24 and 36 is 12; $24 \div 12 = 2$, $36 \div 12 = 3$.

Q5. A) $7/9$ — Same denominator: add the numerators: $2 + 4 + 1 = 7$, so $7/9$.

Q6. A) $1/2$ — $7/8 - 3/8 = 4/8$, which simplifies to $1/2$.

Q7. A) $1/2$ — $(2 \times 3) / (3 \times 4) = 6/12 = 1/2$.

Q8. A) $3/2$ — Dividing by a fraction means multiplying by its reciprocal: $3/4 \times 2/1 = 6/4 = 3/2$.

Q9. A) $3/5$ — $0.6 = 6/10$, which simplifies to $3/5$.

Q10. A) 0.35 — $7/20 = 35/100 = 0.35$.

Q11. A) 6.12 — $2.45 + 3.67 = 6.12$.

Q12. A) 5.65 — $10 - 4.35 = 5.65$.

Q13. A) 12.8 — $3.2 \times 4 = 12.8$.

Q14. A) 2.75 m — $5.5 - 2.75 = 2.75$.

Q15. A) 0.5, 0.55, $3/5$, $2/3$ — Converting all to decimals: 0.5, 0.55, 0.6 ($3/5$), 0.667 ($2/3$) — already in ascending order.

Scoring: 15/15 — excellent, move to Week 5. 13–14/15 — solid, review the missed ones. Below 13/15 — practice converting fractions to decimals on paper before comparing them; that single skill fixes most mistakes here.
