

Exam Pattern — Class 5 Mathematics Olympiad

1. SOF IMO — Level 1 (the exam everyone takes)

Section	# Questions	Marks each	Total marks
1. Logical Reasoning	15	1	15
2. Mathematical Reasoning	20	1	20
3. Everyday Mathematics	10	1	10
4. Achievers Section (HOTS)	5	3	15
Total	50	—	60

- **Duration:** 60 minutes.
- **Question type:** Objective, 4-option MCQ.
- **Negative marking:** None.
- **Difficulty shape:** Same idea as Class 4 — Sections 1–3 are mostly single-step; Achievers is 2–3 step HOTS and worth **3 marks each** (vs. 2 marks at Class 4) — even more leveraged for a good score and for tie-breaks.
- This is bigger than Class 4's paper (35 Q / 40 marks) — Class 4 and below use the 35/40 shape; Class 5 and above (through at least Class 10) use this 50/60 shape.

2. SOF IMO — Level 2 (for qualifiers only)

- Same 4-section structure and 60-minute duration, materially harder — more multi-step reasoning throughout, including in Sections 2 and 3.
- **Who qualifies for Level 2** (any one of these, class-wise/zone-wise):
 - Top 5% of students in that class, zone-wise, in Level 1.
 - Top 25 rank holders, zone-wise and class-wise.
 - The class topper, if ≥ 10 students from that class appeared and the topper scored $\geq 50\%$.
- **2025–26 Level-2 cutoff for Class 5:** 42/60 total, with section minimums around Achievers (M4) 12, Mathematical Reasoning (M2) 13, Everyday Mathematics (M3) 9, Logical Reasoning (M1) 8 — treat as a target, not a guarantee, since cutoffs are revised each year.
- **Tie-break order** when totals are equal: Achievers → Mathematical Reasoning → Everyday Mathematics → Logical Reasoning (same priority order as Class 4) — Achievers is the highest-leverage section twice over: triple marks, and first tie-breaker.

3. Silverzone iOM — Class 5

30 questions, 40 minutes, 100 marks total. Sections: Mathematics (units below), Reasoning and Aptitude, and Scholar's Zone (HOTS).

Unit	# Questions	Marks each	Total
Numbers and Their Operations	5	3	15
Parts and Whole (fractions/decimals)	3	3	9
Percentage, Ratio and Proportion	4	3	12
Geometry and Measurement	6	3	18
Graphical Representation of Data	2	3	6
Reasoning and Aptitude	5	3.5	17.5
Scholar's Zone (HOTS)	5	4.5	22.5

No negative marking. English only.

4. Unified Council UIMO — Class 5

Section	Marks
Mathematics	35
Logical Reasoning	10
Critical Thinking (HOTS)	5
Total (50 questions)	50

Objective MCQs, no negative marking. Maths syllabus explicitly includes ratios, speed/distance/time, simple interest, and profit/loss — all new compared to the Class 4 UIMO paper.

5. What this means for practice

Same shape as Class 4's three exams, just scaled up: strictly timed, all-MCQ, zero-negative-marking, with the same four ingredients (arithmetic → applied word problems → reasoning puzzles → multi-step HOTS) in different proportions, plus two genuinely new topic areas (percentage/ratio/proportion and profit-loss/simple-interest). The practice plan and sample paper here are built to the **SOF IMO shape** (50 Q / 60 marks / 60 min, 4 sections) since it's the strictest superset.
